

We're readySC Boeing Project, a division of the SC Technical College System. Our team of Instructors and support staff provide world-class Training and Development services to Boeing South Carolina, collaboratively developing a talented aerospace-ready workforce that improves the design/build efficiency and effectiveness of the most advanced airplanes in the world.

We are currently looking for a Technical Training Instructor in the Composites discipline.

As a Technical Training Instructor your primary responsibility is to educate students to standard proficiency levels in aerospace manufacturing.

RESPONSIBILITIES:

- Secure qualification in accordance with the Boeing Company standards as well as conduct training in compliance with the aforementioned applications as directed.
- Conduct training in compliance with Boeing standards and policy. Deliver courses as written including check-in of participants. Ensure all materials are in the classroom, checking of pre-requisites and pre-work. Clean-up classrooms at end of class.
- Pick up all necessary paperwork for courses from the Admin office. Complete and drop off any required information for the course back to the admin within 24 hours of course completion.
- Deliver attendance within the established deadlines.
- Work with students in both the classroom and lab setting.

MINIMUM AND ADDITIONAL REQUIREMENTS:

A Bachelor's degree in related field or equivalent work experience is desired. Previous experience should include teaching in a classroom environment or other group training setting. Familiarity with manufacturing production environments, engineering drawings, manufacturing management software, curriculum development and web based processes is highly desirable. Candidates should be able to work independently, be self-directing, have good verbal and written skills, and be available to work different shifts.

PREFERRED QUALIFICATIONS:

- 3 years training experience
- Experience in manufacturing preferred.
- Experience with composite fabrication and composite repair.
- Ability to conduct training while standing for 3 hour training sessions.
- Compliance in maintaining proprietary information.

Persons interested in this opportunity should apply online at <http://www.jobs.sc.gov> and select SC Technical College System, System Office from the agency listing. Please complete the State application to include current and previous work history and education. A resume may be attached, but not substituted for completing work history and education sections of the application or to determine if an applicant has met the minimum qualifications and additional requirements for the position.
